

## 6,000 mile Service / 6 month

In the USA and Japan service intervals for the Nissan GT-R are set at every 6,000 miles or 6months. The 6,000 month / 6,000 mile service checkup is a great starting point in maintaining optimal performance from your GT-R.

- Inspect steering, linkage, axles and suspension components
  - Inspect safety restraint system
- Inspect brake pads, rotors, lines, and cables
  - Inspect drive shaft boots
- Replace engine oil with Mobil 1synthetic
- Replace engine oil filter using OE Nissan
  - Inspect exhaust system
- Adjust tire air pressure and reset tire monitor
  - Road test

### Prices from \$154.10

Starting at \$154.10 plus tax hazardous disposal fees, and shop supplies. August 2012. Prices subject to change without notice.

## 12,000 mile Service / 12 month

The 12 month or 12,000 mile service interval is essential in ensuring critical mechanical systems are performing at the highest level. Engine Balance / Tuning services and Transmission Optimization services are performed to maintain peak GT-R performance.

- Perform engine diagnostic
- Inspect throttle chamber
- Inspect air pump cleaner
- Inspect steering, linkage, axles and suspension components
  - Inspect safety restraint system
- Inspect brake pads, rotors, lines, and cables
  - Inspect drive shaft boots
- Replace engine oil using Mobil 1synthetic
- Replace engine oil filter using OE Nissan
- Inspect differential oil (front and rear)
